Social Psychology: Goals In Interaction (6th Edition)

Synopsis

Reveals social behavior motives, and bridges the person and the social situation. A unique integrated approach to social behavior, Social Psychology, 6/e invite readers to consider the interplay of influences inside and outside the person in social situations. The authors emphasizes how social psychology is an important discipline, connecting different areas of psychology (e.g., clinical, organizational, and neuroscience) as well as other behavioral sciences (e.g., anthropology, biology, economics, medicine, and law). Organized around the two broad questions - "What purposes does this behavior serve for an individual?" and "Which factors lead an individual to use this behavior to achieve those goals?" - each chapter considers factors in the person, in the situation, and in their interaction, to form an understanding of human behavior.

REVEL from Pearson is an immersive learning experience designed for the way today's student read, think, and learn. REVEL modernizes familiar and respected course content with dynamic media interactives and assessments, and empowers educators to increase engagement in the course, better connecting with students. The result is increased student engagement and improved learning. REVEL for Kenrick Social Psychology, 6/e will be available for Fall 2014 classes.

Teaching and Learning Experience This program will provide a better teaching and learning experience- for you and your students. It:

- Immersive Learning Experiences with REVEL:** REVEL delivers immersive learning experiences designed for the way today's students read, think, and learn.
- Explore Research:** Students can explore research around the world with new Original Research Videos. Investigation questions further encourage students to analyze the material in each chapter.
- Demonstrates Practically:** Several features throughout the book help readers connect abstract ideas to real-life situations.
- Improves Learning:** Effective pedagogy features promote students' learning. For examples, Quick Quiz Self-tests in each chapter allows students to test their understanding of the material.
- Support Instructors:** Video embedded PowerPoints, MyTest, clicker questions, and an instructor's manual provide instructors with extensive materials to supplement the text.

Customer Reviews

Douglas T. Kenrick is a professor at Arizona State University. He received his B.A. from Dowling College and his Ph.D. from Arizona State University. He taught at Montana State University for four years before returning to ASU. His research has been published in a number of prestigious outlets, including Psychological Review, Behavioral and Brain Sciences, American Psychologist, Handbook of Social Psychology, Journal of Personality and Social Psychology, Current Directions in Psychological Science, Perspectives on Psychological Science, and Personality and Social Psychology Review. He is author of the 2011 book: Sex, Murder, and the Meaning of Life: A psychologist investigates how evolution, cognition, and complexity are revolutionizing our view of human nature, and in 2013, with Vlad Griskevicius, he wrote The Rational Animal: How evolution made us smarter than we think. He has taught a graduate course on teaching psychology, and he thoroughly enjoys teaching undergraduate sections of social psychology, for which he has won several teaching awards. Steven L. Neuberg is Foundation Professor of Psychology at Arizona State University. He received his undergraduate degree from Cornell University and his graduate degrees from Carnegie-Mellon University. He spent a postdoctoral year at the University of Waterloo in Canada and has since taught at ASU. Neuberg's research has been published in outlets such as Advances in Experimental Social Psychology, Journal of Personality and Social Psychology, Psychological Science, Handbook of Social Psychology, and Perspectives on Psychological Science, and has been supported by the National Institute of Mental Health and the National Science Foundation. He has received a half dozen teaching honors, including his college's Outstanding Teaching Award and the ASU Honors College Outstanding Honors Disciplinary Faculty Award. He has served on federal grant review panels and as associate editor of the Journal of Experimental Social Psychology and teaches a graduate course on teaching social psychology. Robert B. Cialdini is Regents' Professor Emeritus at Arizona State University, where he has also been named Graduate Distinguished Professor. He received his

undergraduate degree from the University of Wisconsin and his graduate degrees from the University of North Carolina. He is a past president of the Society of Personality and Social Psychology and has received the Society's award for Distinguished Scientific Contributions. His research has appeared in numerous publications, including Handbook of Social Psychology, Advances in Experimental Social Psychology, and Journal of Personality and Social Psychology. His book, Influence: Science and Practice, has sold over 2 million copies and has appeared in 28 languages.

Purchased for a class, easy to follow. There is supplemental online material with some of the books, but I didn't opt for that package.

The University's bookstore did not have the book in stock. I am most grateful to . The book met and exceeded all expectations.

Great psychology book on how to deal with cultural differences an all round great text book.

It's a great book. I just wish it was more affordable

It helps that it also came with an online code and has quizzes and tests throughout the chapter. I used them as a sort of study guide.

The book I received smells of cigarette smoke so badly. This is extremely concerning for someone who has asthma.

It far surpassed my expectations for it arrived early and it was a brand new book with an answer sheet included.

I received a decent book to use, just a little dirty.
