# Frank Einstein And The EvoBlaster Belt

## Synopsis

More clever science experiments, funny jokes, and robot hijinks await listeners in book four of the *New York Times* bestselling Frank Einstein chapter book series from the mad scientist team of Jon Scieszka and Brian Biggs. The perfect combination to engage and entertain listeners, the series features real science facts with adventure and humor, making these books ideal for STEM education. This latest installment examines the quest to unlock the power behind the science of *“All Connected Life.”* Kid-genius and inventor Frank Einstein loves figuring out how the world works by creating household contraptions that are part science, part imagination, and definitely unusual. In the series opener, an uneventful experiment in his garage-lab, a lightning storm, and a flash of electricity bring Frank’s inventions—the robots Klink and Klank—to life! Not exactly the ideal lab partners, the wisecracking Klink and the overly expressive Klank nonetheless help Frank attempt to perfect his inventions. In the fourth book in the series, Frank—along with his best friend, Watson, and Klink and Klank—once again finds himself in competition with his classmate and archrival T. Edison and his sign-language-speaking sidekick, Mr. Chimp, over Frank’s newest invention: the EvoBlaster Belt, which allows the user to evolve and devolve into other forms of life, blasting from one species to another. Integrating real science facts with wacky humor, a silly cast of characters, and science fiction, this uniquely engaging series is an irresistible chemical reaction for middle-grade listeners. The Frank Einstein series encourages middle-graders to question the way things work and to discover how they, too, can experiment with science. In a starred review, *Kirkus Reviews* raves, “This buoyant, tongue-in-cheek celebration of the impulse to keep asking questions and finding your own answers” fires on all cylinders, while *Publishers Weekly* says that the series “proves that science can be as fun as it is important and useful.” Listen to all the books in the *New York Times* bestselling Frank Einstein series, available on audio from Listening Library: *Frank Einstein and the Antimatter Motor* (Book 1), *Frank Einstein and the Electro-Finger* (Book 2), *Frank Einstein and the BrainTurbo* (Book 3), and *Frank Einstein and the EvoBlaster Belt* (Book 4). Grade Level: 2 - 5

## Customer Reviews

Jon Scieszka's books have sold more than 11 million copies. He is the author of The Stinky Cheese Man and Other Fairly Stupid Tales, The True Story of the 3 Little Pigs, the Time Warp Trio series, the Spaceheadz series, and most recently, Battle Bunny, coauthored by Mac Barnett. In 2008, Scieszka was named the inaugural National Ambassador for Young People's Literature by the Library of Congress. He is also the founder of Guys Read, a web-based literacy program for boys. Scieszka lives in Brooklyn, New York.

Great science series for our then 5 and now 6 year old. The adult will most likely be doing all the reading. We treat it like the old serial programs and end every chapter with. DUN, DUN, DUN, DUN!

My kids love this series, ever since they got the first two as a birthday present from a teacher. We pre-order the books now, and they celebrate when the next one arrives! The books teach my kids scientific concepts in a wonderful, kid-friendly way through creative story telling and fun illustrations.

The book was very informative.

My 9 yr. old son loves these books. If your a robot lover....this is the book for you!

Both my grandsons ages 9 and 10 loved the book.

My 8yr old son loved it. Read the whole book the day he got it.

Great book and series for kids

Thank you!
