Customer Reviews

This is the first Brit in the FBI for me, but I like Catherine Coulter, so I decided to try the series. It was every bit as interesting a plot as the Sherlock and Savich books. The latter even has a small role. I intend to move backwards and add the first three books in this series.

The premise was great. One of Tesla's inventions as weapon made it seem so plausible and fantastic at the same time. Mike, Nicholas and their team are once again in the thick of things. This is another hit for this series. I enjoy reading this series. The Devil's Triangle is my favorite

Great book by Catherine Coulter and JT Ellison. Fast paced, full of intrigue, suspense and a touch science fiction thrown in.... Well written. Be warned once you start reading it, you will struggle to put it down!!! Love the series and I can't wait until the next one.....

Catherine Coulter is one of my favorite authors. I look forward to her FBI books. I have read them multiple times. Her characters really come to life. Her continuing adventures of Nicholas Drummond and his partner Michaela Caine are a real thrill ride. The story travels all around the globe as their team races to save the day and stop the bad guys. I recommend all her books if you like thrilling, character based stories. A definite summer beach read.

Story was relatively original, but equal emphasis was placed on the romantic entanglements as it was on the plot. That might work for some, but I thought it tedious. So much focus on their looks, clothing and hair. Not so much on the suspense.

How do they continue with so many exciting adventures! So far this is the best book in the series. I couldn't stop reading it. All the details. I'm sure they must spend countless hours doing research....thank you for another exciting book!

This book did not disappoint whatsoever. From the start to the finish was nothing but excitement. This time they went to Italy to help an old foe of theirs. This book will keep you on the edge of your seat the whole time!!!!

Anyone who likes mysteries.Quick read. Some timecard to follow. If I had been to Italy and more about the geography maybe it would have been more understandable.
