Stroke Rehabilitation: A Function-Based Approach, 4e

Synopsis

Learn to confidently manage the growing number of stroke rehabilitation clients with Gillen's *Stroke Rehabilitation: A Function-Based Approach*, 4th Edition. Using a holistic and multidisciplinary approach, this text remains the only comprehensive, evidence-based stroke rehabilitation resource for occupational therapists. The new edition has been extensively updated with the latest information, along with more evidence-based research added to every chapter. As with previous editions, this comprehensive reference uses an application-based method that integrates background medical information, samples of functionally based evaluations, and current treatment techniques and intervention strategies. Evidence-based clinical trials and outcome studies clearly outline the basis for stroke interventions. UNIQUE! Survivor's Perspectives help readers understand the stroke rehabilitation process from the client's point-of-view. UNIQUE! Case studies challenge readers to apply rehabilitation concepts to realistic scenarios. UNIQUE! A multidisciplinary approach highlights discipline-specific distinctions in stroke rehabilitation among occupation and physical therapists, physicians, and speech-language pathologists. Review questions in each chapter help readers assess their understanding of rehabilitation concepts. Key terms and chapter objectives at the beginning of each chapter help readers study more efficiently.

Book Information

Series: Stroke Rehabilitation

Hardcover: 768 pages

Customer Reviews

I use for my OT class. Provides good explanation of how to help stroke patients.

Really detailed, well written, simple to read. A must for anyone who wants to learn about stroke.
Definitely a keeper!

A lot of great info and insight for the inpatient, acute and sub acute therapist. I really love the evidence based treatment ideas

Details rationale for intervention and specific strategies you can apply in practice.

This is a good book for stroke rehab.

as described

Great Book / Delivery on time / Good deal !

Great resource
