Science And Technology (Inside Ancient China)

Synopsis

A survey and critique of the major theories of financial crises. This second edition covers the period from 1985 and the stock market crash of 1987, the collapse of the S&L industry, the severe problems of US commercial banks, and the increasing risks posed by junk bonds.

Best Sellers Rank: #4,413,560 in Books (See Top 100 in Books) #81 in [Books > Teens > Education & Reference > Science & Technology > History of Science](#) #175 in [Books > Teens > Education & Reference > History > Asia](#) #321 in [Books > Teens > Education & Reference > History > Ancient](#)

Age Range: 12 - 17 years

Grade Level: 7 - 12

Customer Reviews

Beginning with a brief introduction, a map, and a list of China's main dynasties, this colorful book surveys science and technology developed by the ancient Chinese. Strapp discusses early compasses and mapmaking, the building of canals, and the invention of amazing machines such as the wheelbarrow, water clocks, gunpowder, and the harness. The last chapter looks at Chinese medicine and feng shui. Though the reading level is relatively high, the writing is clear and the format is inviting, with many sidebars and pictures. Illustrations include photos of artifacts and maps as well as period artwork and line-and-wash pictures demonstrating points and processes mentioned in the text. The book concludes with glossaries of terminology and names as well as lists of books and Internet sites. Other books in the Inside Ancient China series introduce art and architecture, government and society, philosophy and writing, and everyday life. Grades 7-10.
