Deborah Morley has authored more than ten popular computer textbooks, including UNDERSTANDING COMPUTERS: TODAY AND TOMORROW and UNDERSTANDING COMPUTERS IN A CHANGING SOCIETY. Professor Morley earned her B.S. and M.S. degrees in Business Information Systems from California State University, Fresno. Today, she offers more than ten years of experience teaching at the college level.

It was very useful and informative to me, as well as the price for a textbook rental.

Its a rented textbook so of course there will be damage to it. However, everything was legible and no pages missing

Was able to obtain the book in seconds. Great option.

Great book! Exactly what I was looking for!

I studied this book for my Intro to Computing class and found very interesting. This book covers topics beyond computing namely data communications as well. It also discusses the history or evolution of digital computing, worldwide web, software development processes, hardwares, network types and topologies, cyber crimes, and so many other things. This book is more than enough. It definitely addicts students like me and influences them to choose Info Sys, Info Tech, or Computer Science as their major. I believe this book is suitable for both introductory or survey courses "101" and Independent Learning courses "X99

This book is complete trash. As a senior Computer Science major I can honestly say that this book has so much incorrect information it is scary that people teach with this.This book actually attempts to touch on higher level computer science, without having any idea what it is talking about.

This is in the item's description:"With purchase you get 2 books - Understanding Computers: Today and Tomorrow Comprehensive (ISBN 978-1-133-19001-1) and Microsoft Office 2010 Fundamentals (ISBN 978-0-538-48140-3)"So I purchased this item thinking I was getting both of the required books I needed for my class. LIES. I only received the first book, after contacting the seller and , they informed me that they just made a mistake in the item's description. So instead of them saying, you know what we're sorry, let us send you the book that you already paid for. The customer service rep had the balls to offer my 50% off the second book!!!Seriously?No. JUST SEND ME THE BOOK I ALREADY PAID FOR! Absolute worst customer service I've received ever from . Completely disappointed.

I got my book long before the date to be shipped. I was very pleased with the service of this company.
