## Synopsis

Drugs. Sex. Murder. Taxes. Welcome to planet Earth. They're here. They've arrived. And they're all eyes. The Voltarian scouting party—illegal aliens extraordinaire—on a top-secret expedition led by one Jettero Heller, Royal Officer of the Fleet. His mission: rescue the planet from pollution and make it safe for the upcoming invasion. His problem: the planet may not want to be saved and the invasion may just be a trick. One way or another, Heller is about to undertake a journey of discovery—and it's a real trip. From a Middle Eastern mecca of drugs—the key to a scheme to bring down the Voltarian government—to the mean streets of New York, he's finding out what makes this world go round. Between the Mafia wars and the brothel whores, between the ruthless IRS agents and the crazy cab drivers, between the muggings and the weapons of mass destruction, this is one learning curve that's about to turn into a roller-coaster ride. And before it's over, all Heller will break loose . . . in the name of BLACK GENESIS. “Ironical, exciting, romantic and hilarious.” —ORSON SCOTT CARD New York Times Best Seller L. ## Customer Reviews

This entire series is intended as satire, primarily of the government and multi-national corporations. This first book sets up not only the plot, but also develops the characters a bit, mainly the narrator, who is also the villain of the series. This first book is a little slow as there are some necessary plot devices to set things up for later, but overall a good read. How good? I got this book two weeks ago, and I'm already halfway through the third book. The pace really picks up a bit in the second book, and so far the third book is the best of the three.

I love this whole series of Mission Earth. This second volume of the ten volume series is very funny and well written. It has a background tension/problem which sets the pace and keeps my interest in how it will all work out. Excellent to read...very entertaining.

Very difficult to put down. The writing pulls you along. There are so many levels of viewpoint at any one time. Extremely complex plot but the writing is so accomplished and professional that everything just adds up so easily and naturally that it seems simple.

When L Ron Hubbard set out to write this series, he wanted to write the biggest science fiction work ever written. At ten volumes, it is one of the biggest (if not THE biggest) science fiction work ever written. Brilliantly plotted, it is a delight to read. There is an element of satire running through the series. This must be one of the most underrated science fiction work of all time.

The Invader's Plan is one of the most entertaining science fiction works I've ever read. I didn't know what I was in for but Hubbard really delivers in this first one of a series of books he put out some decades back that honestly predicted the future, or was it a look at the past? Science Fiction writers have a way of doing this, but Hubbard is the best one I've ever read. I will be buying the whole "dekology". I will never ever forget this piece as it so cleverly takes satiric potshots at our current "culture".

I read these in hardback when they first came out. I am in the process of rereading them on my Kindle. Being older and maybe more mature, I pick up the comedy aspects a lot better now which makes them even more enjoyable.

There are parts that are bleeping funny then you go bleep this is a long bleeping book I wish the bleepard would have edited a few of the bleeping chapters out. It is for the most part a good book but you have to at times slog thru it. In the other 9 bleeping books the satire of the bleeping news organizations are dead on and the willing lemmings of the population to believe them. He takes Hits at the IRS ( which is becoming more true all the time the bleeping bleep turds), Shrinks, Law Enfocment, The Goverment in general etc.All swearing is Bleeped out by a Goverment censor AI. So every time a character swears in the book it is bleeped out by the bleeping AI.

Finally got this in hardcover. Great book series
