| <b>Pulmonary Coding Tip</b><br>If a definitive diagnosis has not been established by the end of the encounter, it is acceptable to report signs(s) and/or symptoms(s) in lieu of a definitive diagnosis. When sufficient clinical information is not known or available about a particular health condition to assign a more specific code, the appropriate "unspecified" code (eg, a diagnosis of pneumonia has been determined, but not the specific type), unspecified codes should be reported when they are the codes that most accurately reflect what is known about the patient's condition at the time of that particular encounter.<br>The inclusion of the + (dash) symbol indicates that an additional digit is needed. For example, Cancer Bronchus C34.0+.                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## Synopsis

The ICD-10-CM 2017 Snapshot Coding Cards provide commonly reported diagnostic codes and associated guidelines for a specialty. Pushpin icons help Snapshot users connect coding tips back to specific codes. These easy-to-use reference cards allow health care providers and staff members to quickly locate a desired code.

## Book Information

Series: ICD-10-CM 2017 Snapshot Coding Cards

Pamphlet: 4 pages

Publisher: American Medical Association; 1 edition (October 31, 2016)

Language: English

ISBN-10: 1622024362

ISBN-13: 978-1622024360

Product Dimensions: 8.5 x 0.1 x 11 inches

Shipping Weight: 0.8 ounces (View shipping rates and policies)
