Gerontological Nursing: Scope And Standards Of Practice (Ana, Gerontological Nursing)

Synopsis

The goal of gerontological nursing is to provide the highest quality of care to the older adults within a healthcare system facing an unprecedented increase of their numbers. To do so, gerontological nurses employ a shared body of skills and knowledge to address the full range of needs related to the process of aging, the specialized care of older adults, and the uniqueness of older adults as a group and as individuals. These specialists lead interprofessional teams and collaborate with older adults and their significant others to promote autonomy, wellness, optimal functioning, comfort, and quality of life from healthy aging to end of life. This is the most succinct one-volume guide to the essentials of gerontological nursing: its practice environments and settings, its science and other evidence- and research basis, its education and professional development, and its ethical, societal, and cultural context.

Book Information

Series: Ana, Gerontological Nursing

Customer Reviews

I got this 2 days before my exam and read half of it after the mailman have it to me. I planned to read the remaining part that evening but forgot and the next day I was busy with workers in my house and truly to take my last practice test I didn't bother. I did glance at the remaining half and took a bit of a look at unfamiliar terms. Lo and behold, I had about 3 or 4 questions from this book. Si I'm glad I got it. I took a star of because it's not organized as a test aid so even when I came back to reference a question, it wasn't directly stated, more so implied. Can you wing it without this book?

It's a 175 questions with 150 graded. I noticed the questions from this book were the very direct questions vs the convoluted stuff. The others were stuff you can only do via practice and I was able to do about 700 questions and practice test via a schoology qbank course which was great. The practice questions helped and the exams on there were timed with 175 questions and 150 graded just like the real exam. The good thing about that was it had questions from this manual and most of the reference books so I was well prepared. Honestly, that was the best prep I had. I learned so much from the rationales and being able to practice on the computer under timed settings was priceless.

Very useful reference book! Arrived in excellent condition too! Great buy! Thanks Deb S, in Ohio

This book helped in studying for ANCC's Gerontological Nursing exam. It explains the Scope of Gerontological Nursing practice inclusive of education, legislative, regulatory, and legal issues. It describes the Standards of Gerontological Nursing Practice, which include Assessment, Diagnosis, Outcomes Identification, Planning, Implementation (coordination of care, teaching, health promotion, consultation, treatment), Evaluation. It describes the Standards of Professional Performance, which include Quality of Practice, Professional Practice Evaluation, Education, Collegiality, Collaboration, Ethics, Research, Resource Utilization, Leadership, and Advocacy. The Standards of Gerontological Nursing Practice and Standards of Professional Performance are presented in a list format, which makes it easy to follow and remember. This format also helped me to recall facts and information, while studying. I highly recommend this book and "Toward Healthy Aging: Human Needs and Nursing Response, 7th ed" by Ebersole to study for the exam. Hope "Gerontological Nursing: Scope and Standards of Practice" helps you too!
