Great maps of the Needles, great descriptions of the area. Make sure you get the 'loose' maps sold with the book. They are the best part for the ultimate climbing experience.

Paul Piana and Todd Skinner are well known in the world of climbing. But some folks don't know that Paul first climbed in the Needles, in the early seventies. His descriptions of the routes are sometimes sketchy, but this is nonetheless the classic book on climbing in the Black Hills. He includes some maps of the various areas, and a good introductory section on the history of climbing in the area. Some interesting biographical notes, including Herb and Jan Conn, some Yosemite greats and others.

Touch the sky is a great book for its time, but don't buy this book and expect to find a modern day guidebook. Lots has changed over the years and lots of details were not included in this guidebook. There is a new book out for the Mount Rushmore area and other areas east of Harney Peak that has something like 900 routes in it. Plenty of adventure climbs to keep you busy. If you are a fan of the Needles, and like climbing history...be sure to grab a copy of Touch the Sky. If you are looking to come and climb here...grab the new Busse and Burr book.
