Excellent little story for your little ones to read before visiting an aquarium or sea park. Little Critter

and his classmates take a field trip to the aquarium to learn about sea life. The visuals are all very well done just like all the other Mercer Mayer stories. The kids see all the fish and normal attractions you would find at most aquariums. It is a nice little story and our daughter gets excited when we pick it out to read. Although I have never heard of a restaurant that sells a "swordfish burger" sounds intriguing. Our favorite part of the story is when Little Critter is daydreaming about snorkeling in the sea and finding a real octopus out in the wild. The bright colorful illustrations make it easy for our daughter to follow the story and stay focused. We bought this story book along with the Berenstain Bears at the Aquarium. To show our 5 year old daughter what she would see at Sea World on our vacation. Both books are around the same price and tell the same story. I always liked the animation in the Mercer Mayer stories a little more than the Berenstain Bears. You might want to check both books out at your local library before purchasing the one you like best. If you are trying to teach your little guys about fish this is a nice book to start with. I would rate it 4 stars.

My son is 6 and a beginner reader. This is a great book for other kids at the same level. It is easy to read but has some more complicated words that are not impossible to pronounce. The pictures are fantastic in this book...very detailed and super cute. The book takes only around 5 minutes for a young child to read. A+

We bought these for our 4YO, who was progressing quickly through the Bobbs books but getting little out of them as they had no story. If you've not used these books before there are some things to note. These are more complex than other first readers, it's nice to just 3 or 4 letter words, it took my LO a long time to work out how to say favourite. There is word repetition and as an adult, by god it can be annoying. The books are pretty long so don't expect to finish it in one go. That being said hard work is ok and my son has enjoyed working on these. We have a process of I read a page, then he reads one to boost his confidence. Overall I'm happy with the book but I would like a slightly simpler first reader.

Fortunately, we live in northern California and have had the ability to take our kids to the Monterey Aquarium and the ocean and I truly feel my little guy can relate to a lot of the things in this book from things he's seen. He LOVES sharks so the opening page is a real winner. Plus, each character seems to have their own individual experience so different children can relate (one child falls in the petting tank, another child is scared). Also, they introduce a manatee in this book and you don't often see manatees referenced so that was a very pleasant surprise. We have been reading this

book on and off again for a year and my little boys still loves to have me read it to him.

Love the Critter series of books. Great for the little ones and good for the beginning reader. Fun!

My grandkids love this book. Great book for beginners.

Little Critter and his friends are on a class trip to a Sea Park where they get to see fish and other sea creature of all kinds of shapes and sizes, they even get to feed and touch some of them! This is great for kids who love animals, especially aquatic ones. Especially if they've been or are going to a Sea Park. My daughter loves animals and especially all the Little Critter books so this was a nice edition to her collection, we've been adding more of (My First I Can Read) books lately, and she's likes the LC versions of them. Mercer Mayor is always a win-win to any Littler Critter's library! Highly recommended!

Super cute and fun
