Customer Reviews

When I was in high school I used to go on camping trips with the school's outdoor club. I also hiked through the Allegheny National Forest for a week with a friend. So I had the taste of an outdoor life. Although we had all our supplies and didn't have to forage from the forest or improvise anything to survive, I can see how a book like this could have come in handy if we had been stranded in the woods for any reason. Bushcraft offers a detailed and precise guide of what to do and use to survive if you get lost or become disabled while you're hiking or camping in a wilderness. You don't even have to get lost or become disabled while in the woods. Suppose you live in a wooded area and a forest fire or some other natural calamity caused you to flee your home and into the woods for survival. Having a book like this and learning its content can help you weather the situation until you're safely returned to your normal life. You will learn how to make shelter from twigs and branches, weapons from sticks and stones and how to collect water from rain and dew or how to convert your tarp or blanket into a tent, plus many other tricks and suggestions. Even if you don't have an immediate need for a book like this, keeping one in your possession will be a good assurance if and when you need it.

Don't buy this. You can read the whole thing in 20 minutes and what's there is completely unhelpful. It is essentially a 7th grade child's report on outdoor survival that would probably earn him a C at best. You can learn more in a Wikipedia article. And then there are the bonus books. Actually, if you need a laugh, buy this solely for the dirty talk guidelines book. The hilarious "advice" there was almost worth the 3\$. I just looked at the other reviews which are obviously fake. Wow.

This book could be useful for a wide variety of people. I learned how to find my own food or water, build a shelter, navigate, stay warm, and even basic first aid. These are all survival tactics that every human should know. You never know when you may be stranded somewhere. If you're an outdoorsman, this is a must buy! Highly recommended read.

This book hits all of the main points with survival. It isn't for everyone, but if you are going to be outside at all, these are the skills you are going to need to master. Nature is out there and will kill you if you give her a chance. Overcoming the obstacles of finding food, shelter, water, and rescue are something that everyone ought to know, but sadly too few are aware of. This book covers all of the main points and no doubt could get you out of a pickle in a jiffy if you need to. Though, I love nature, so this book is perfect for me and I learned a lot of new survival skills that I hadn't heard

before. You have to check this one out if you hope to survive out in the forest or anywhere outside!

Having lived in Africa for most of my life, I thought I knew all there is to know about surviving in the wild. Davin's book proved me wrong. And am glad I bought the book. Davin lays out his points, logically, succinctly and it's very easy to understand and follow his survival tips. As I have camping as one of the items on my To Do List, this book will come in handy when I eventually get around to it.

There's almost no information on bushcraft here. Very very simplified info that takes about 15 minutes to read and the rest of the supposed "400+" pages is separate essays on gardening, mini farms, and agricultural stuff. Really not what it is advertised as. You learn more "bushcraft" your first day in cub scouts. Find another resource.

There is 6 chapters relating to bushcraft skills, which vary between 2 to 3 pages each...followed by topics everything from Straw Bale Gardening, bee keeping, DIY landscaping, Homemade Shampoo/Body butter/ recipes and a chapter on how to end your marriage.. WHAT THE F***! Worst 2.99 I've ever Spent on an E book.

An incredible learning point for wilderness skills or what we call Bushcraft. Bushcraft is a skill of anything pertaining to bush country or as finding one's way for hunting, finding water and foods. A very informative handbook specially for beginners who would like to go on their first camping in wilderness and wants to learn survival skills incase of emergencies or any incident that might happen.
