Case Studies T/A Clinical Manifestation And Assessment Of Respiratory Disease

Synopsis

Focusing on assessment through therapist-driven protocols, this valuable tool provides an overview of the assessment process and fundamentals needed for success. It offers discussion of the top five treatment protocols: oxygen, hyperinflation, bronchial hygiene and bronchodilator therapies, as well as mechanical ventilation. Using a case study approach, students learn to manage an entire case from beginning to end. Each time they assess the patient, they use the SOAP format: Subjective, Objective, Assessment, and Plan reasoning, giving them practice in documenting history and developing care plans.

Book Information

Paperback: 304 pages

Publisher: Mosby; 2 edition (April 18, 2001)

Language: English

Customer Reviews

Terry Des Jardins, MEd, RRT; George G. Burton, MD, FACP, FCCP, Medical Director, Respiratory Services, Kettering Medical Center, Kettering, OH

Great book for an RT.

Thanks for this book, it has helped me immensely in my studies!! It arrived on time and has been a staple in my book work!! So glad I bought it!!

The book I received was in decent condition but it had writing inside of it
