Wealth, Poverty And Politics

Synopsis

In *Wealth, Poverty, and Politics*, Dr. Thomas Sowell of the Hoover Institution, Stanford University, examines the reasons for large differences in income and wealth between nations and among groups within nations. A wide range of geographic, demographic, cultural, and political factors are examined, not to find a single factor or a single combination of factors that will explain all economic differences, but to show how particular combinations of factors limit or expand the possibilities for specific nations and peoples at specific times and places. Dr. Sowell also examines some popular explanations of these differences and shows why they will not stand up under scrutiny. In doing so, he takes on some of the reigning titans of the redistributionist movement—including John Rawls, Thomas Piketty, Paul Krugman, and Joseph Stiglitz—and shows how a remarkable number of their claims cannot withstand plain common sense, expressed in plain English.

While Sowell offers no pat solutions, his implied argument that cultural considerations must inform any serious attempt at improving the economic prospects of an underperforming nation or group merits serious consideration."Conservative Book Club#147;Transcending partisanship through a careful examination of data, *Wealth, Poverty, and Politics* reveals the truth about the most explosive political issue of our time. —Washington Times
