Max The Monkey Has MCADD

Synopsis

Medium chain acyl-CoA dehydrogenase deficiency (MCADD) is a disorder in which the body is not able to correctly convert fats into energy. Children with this disorder are encouraged to: 1.) Eat regularly 2.) Wear a medical alert bracelet. 3.) Stay well hydrated. Throughout this book you will notice zebra stripes in each illustration. In medicine an unlikely diagnosis is termed a *zebra*. This comes from a saying used when teaching medical students about how to think logically in regards to possible diagnoses. *“When you hear hoofbeat, think horses, not zebras”*. The term was coined in the late 1940s by Dr. Theodore Woodward, a professor at the University of Maryland School of Medicine. In the world of rare, inherited metabolic disorders, such as MCADD, physicians are trained to look for the *zebras*, so the term changes to *“When you hear hoofbeats, think zebras”*. We hope you enjoy this story about Max, Minnie and Mo and their journey across the jungle!

Customer Reviews

great idea and love the recipes but clearly written by someone who doesn't hang with too many kids. Our daughter loves the illustrations though and its a blessing to have a book about her condition for kids.

We love this book! We got it to help us explain our oldest son's MCADD to our younger children. The story of Max and his friends is told in a very cute rhyme that was easy for my young ones to understand. As a bonus, there were some fun activities at the end, as well as recipes to try (my 5

year old is eager to try the "monkey cookies!"). Overall, so thoughtfully done, and it facilitated some great conversations in our house to help us explain MCADD. Very happy that a resource like this exists. Thanks to the authors!

This is a must have book for any child with MCADD. It is such a cute story that explains in a way that a child can understand what it is. My son loved it.

this is a wonderful story. so helpful in explaining and teaching children with MCADD their special needs in a playful way.

This book is a must-have for any MCAD family with young children! The story line is simple and understandable - eat often so you have enough energy - and the pictures of Max and his friends are very cute. Our 3 and 5 year olds really like this book and I like that it's about everyday life with MCAD and not all the crummy hospital/doctor stuff. Wish it had been available when they were 1 and 3!!!

great stuff

Great book to help other kids learn about MCADD. Our 5 year old who has MCADD loves showing ths to his friends.

While it was nice for my daughter to read a book with her condition mentioned, it didn't give the info I thought it would, but a nice story
