"as a classroom-type guide to the fundamentals of civil aircraft electronics, it does the job well for aspiring maintenance personnel."- JOURNAL OF THE ROYAL AERONAUTICAL SOCIETY, December 2008

The complete Aircraft Digital and Electronic Systems text for aerospace engineering and maintenance students and professionals

This book gives a deep insight to electronics and cover most modern ones. What is good about this version is it's up to date with new systems. It may not cover systems in details, but it's a very good

start for avionics student. I recommend this book for its simplicity as well.

OK, there is do not have any problem. i need it to change , high quality and very value for this price . Great and affordable product. Good weight which means less pressure while cutting. Excellent ergonomic. Sharp. Cutting tomatoes and onions was a pleasant experience. I bought this product to replace a old one. helpful.

The only single coverage book I have found for EASA Part 66. It came close to me passing Module 5 first time. It lacks enough depth of coverage on some areas like fibre optic (how do you join broken fibre optic together?) and more could be done on LCDs and probably a little more on logic.It is pretty good but there are numerous typographical and wrong answers to questions which do not help. (e.g. bidirectional is two-way not one way).

The ideal book for EASA part 66 A, B1 or B2 students or any JAR-66 standard.This book is for modules 5 & avionics of modules 11 & 13.This goes well beyond the A&P scope.There are many examples to practice.Otmar Bender email Jarman@Jartraining.de international EASA part 66A, B1 & B2 licence training by internet. I was looking for a book to help explain aircraft digital bus systems to students. This book seemed to me to be more on the line of engineering. I did get some useful information, but not as much as I thought, especially when it has "Maintenance" in the title.

This is the best book to cover Module 5 of the JAR 66...It has the same Syllabas and organized chapters...
