Customer Reviews

Book by Barrett, Tina

This book will keep me busy for ages, 4 yr-old-Granddaughter sat and went through the book cover to cover twice before she sat with me and showed me which dinosaurs I needed to make for her. There was only one that she didn't need FIRST! They are fairly well designed, and once can easily do away with the craft felt etc. Our dinosaurs will be well loved and hard working, so durability is key. I have already done two and the T-Rex is "next" the Triceratops is wonderful and one can easily do away with the craft felt etc.

Wish this book was out 19 years ago. My grandson whom I raised would have been thrilled with them that long ago, however, he's still thrilled with them now even though he doesn't show the excitement. Making them for friend's grandson now. Very good book and as usual you send them

Purchased for my mom who used it to make a dino for my son. My mom has a hard time with directions sometimes and she didn't have any issues with this book and it came out great!

The dinosaurs are absolutely adorable. It will be hard to decide which one to make first.

This book is well-written, the instructions are easy to follow, and the collected 'saurs are critters any child will enjoy. A must-have for your toy pattern collection.

Loved knitting the pterodactyl for my new nephew!

I ordered this book to make dinosaurs for my Grandsons and was disappointed to learn that you can only use Merino DK 100% worsted wool for the Dino's and no stores in my area carried it. I did find a source in Columbus, Ohio though that offers free shipping. With that said the patterns are adorable and very easy to follow. I've made over 20 dinosaurs to give away and each one looks totally different because of the yarn colors and the way it is finished. Some of the embellishments are made of felt and involve gluing and most of the eyes have to be hand sewn on. The knitting goes very fast but the actual finishing takes almost as long as the knitting itself. I did find a mistake on one of the patterns so I emailed the author. She responded the very next day from the UK with the correction -- imagine that, from the author herself! Very impressive!

For anybody who loves dinosaurs, or who has a 6 year old who loves dinosaurs should love this book. It features many of the favorite dinosaur varieties in a clear, easy-knitting format. With Big Pictures. and diagrams for most of the extra felt pieces (though not all, which would be one of my chief complaints. Very well indexed.
