

The Professional Practice Of Architectural Working Drawings

DOWNLOAD EBOOK

Synopsis

The practical, comprehensive handbook for creating effective architectural drawings In one beautifully illustrated volume, *The Professional Practice of Architectural Working Drawings*, Fourth Edition presents the complete range of skills, concepts, principles, and applications that are needed to create a full set of architectural working drawings. Chapters proceed logically through each stage of development, beginning with site and floor plans and progressing to building sections, elevations, and additional drawings. Inside, you'll find:

- Coverage of the latest BIM technologies
- Environmental and human design considerations
- Supplemental step-by-step instructions for complex chapters
- Five case studies, including two that are new to this edition
- Hundreds of computer-generated drawings and photographs, including BIM models, three-dimensional models, and full-size buildings shown in virtual space
- Checklists similar to those used in architectural offices
- Tips and strategies for complete development of construction documents, from schematic design to construction administration

With an emphasis on sustainability throughout, this new edition of *The Professional Practice of Architectural Working Drawings* is an invaluable book for students in architecture, construction, engineering, interior design, and environmental design programs, as well as professionals in these fields.

Customer Reviews

Osamu A. Wakita, Hon. AIA, is a retired professor of architecture and former department chair of architecture at Los Angeles Harbor College. He has been involved in architectural education since

1958. He is a recipient of the California Council of the American Institute of Architects' prestigious Outstanding Architectural Educators Award and is listed in the Council's General Reference as one of the leading authorities in perspective drawing. Nagy R. Bakhoun is a licensed architect and principal of Obelisk Architects, Inc., in Torrance, California. He has provided architectural services internationally and throughout the state in which he is licensed to practice. He is an authority on high-end residential housing and commercial projects. He has been involved in architectural education since 1996, and is also a Professor of Architecture in the Los Angeles Community College District system. The late Richard M. Linde, AIA, was a licensed architect and President of the American Institute of Architects.

Lots of example drawings and clearly written text for every step of the process. A very useful book... whether or not you use Building Information Modeling software.

Thanks

This is a must have for any recent architecture school grad.

The book was in great condition!

This is a really good product worth the money spent and because I am a student on a budget I like to shop because of the Price.

purchased for student grandson

I don't quite follow the organization of the book, but the content is good. Great reference even after the class is finished.

Great book, not too overwhelming. Very easy to read.
