A Young People's History Of The United States, Volume 1: Columbus To The Spanish-American War (For Young People Series)

Synopsis

A Young People's History of the United States brings to US history the viewpoints of workers, slaves, immigrants, women, Native Americans, and others whose stories, and their impact, are rarely included in books for young people. A Young People's History of the United States is also a companion volume to The People Speak, the film adapted from A People's History of the United States and Voices of a People's History of the United States. Beginning with a look at Christopher Columbus's arrival through the eyes of the Arawak Indians, then leading the reader through the struggles for workers' rights, women's rights, and civil rights during the nineteenth and twentieth centuries, and ending with the current protests against continued American imperialism, Zinn in the volumes of A Young People's History of the United States presents a radical new way of understanding America's history. In so doing, he reminds readers that America's true greatness is shaped by our dissident voices, not our military generals.

The visionary historical work of professor and activist HOWARD ZINN (1922–2010) is widely considered one of the most important and influential of our era. After his experience as a bombardier in World War II, Zinn became convinced that there could no longer be such a thing as a "just war," because the vast majority of victims in modern warfare are, increasingly, innocent civilians. In his books, including A People's History of the United

States, its companion volume *Voices of a People's History of the United States*, and countless other titles, Zinn affirms the power of the people to influence the course of events. REBECCA STEFOFF is the author of more than 100 nonfiction books for children and young adults, and she has adapted several best-selling history books for younger readers.

Insightful

This series is a great supplemental reading material to use in the classroom. The chapters are short enough for students to read in class, engaging for students, and are thought provoking. I have used these books in my own class several times and the students really enjoy them.

I chose this book for my grandchildren because it is more realistic than the history they teach in public schools.

Using for homeschool US history curriculum for my seven year old.

This view of history explains to young people and to those not so young, the complicated dynamics of the founding of the colonies. I learned history at the dinner table with my father. He went to lectures in Harlem to learn African American history so that he could teach it to his three children. We did not learn it in school. I remember reading a short paragraph, if that much about slavery. I kept re-reading it, because I could not believe that this important topic was essentially excluded from our curriculum. This book makes up for that Zinn is masterful at weaving the research together, with the concepts of racism and class-ism, so that the reader can see and understand how this history unfolds. I highly recommend it and will order it for my students.

My 15 year old needed this book for her Honors American History class over the summer. Couldn't find it anywhere! Thanks to , we got it quickly and she read it within a week, finished her 4 page report on it in no time at all.

Just letting everyone know that this is volume 1, if you think this book has everything, it doesn't.

If you want to cut to the chase and get shed of all the mythology this is a book for your kids. The great men we so revere are shown for what they really thought and who they really were.
