When a New Age book and crystal shop accidentally called the Missing Link becomes the vortex for a global spiritual awakening, one couple stands up for truth and saves humankind from its self-destructive tendencies. Although the plot sounds melodramatic, this visionary work harbors surprises. Like the evangelical novelist Frank Peretti, Simmons sees spiritual warfare everywhere, making for an exciting climactic conflict between good and evil. He does a fine job of explaining New Age thought, demonstrating how its various aspects—crystals, astrology, holotropic breathwork, aliens, I Ching, morphogenic fields, consciousness evolution, spirit guides and channeling—fit together. He also provides a compelling story, with the bad guys (dressed in black, naturally) seeking money and power, and the good characters fighting valiantly for spiritual truth. They help the world evolve to its next stage of consciousness with the assistance of a few good aliens before the planet destroys itself. Despite its tendency toward wordy preachiness, Simmons's novel is fun to read, and doesn't take itself overly seriously. Readers interested in visionary fiction or New Age thought should enjoy this one. (Aug.) Copyright 2000 Reed Business Information, Inc.

Simmons' first foray into fiction comfortably mixes mystery and personal quest. There's a nice dose of levity (and divination, and Rupert Sheldrake's morphic fields, and Sedona, AZ and ...) as metaphysical shopkeeper Will Lerner and his wife, and a few good friends are drawn toward the Earthfire, trailed by some less-than-enlightened thugs. -- NAPRA ReVIEW- Matthew Gilbert

The author's vision that the world is reaching a time of critical mass when our choices will determine whether we are reborn into higher awareness or destroyed by our own actions is a true one. Earthfire illumines our dilemma and leads us to the leap of liberation. Many readers will find this book to be a catalyst for their own awakening and inner growth. -- Dr. Jean Houston

This book touches upon so many things that are dear to me. Had it all. Drama, suspense, love, spirituality, crystals, metaphysical concepts, etc. You can find a bit of it all in here and it will leave you feeling good and wanting more. There are teachings on every page it seems. Something to hold onto and perhaps look into to learn more deeply. Very well written and inspirational. I loved it and wished it had not ended. Is there a sequel to look forward to? Please!

The writing was common place and the story did not draw me in. After about 50 pages I gave up, too boring.

This book was just amazing! Loved it! Thank you!

Okay, I enjoyed the book, but it has its limitations. It is a very good book for introductory ideas regarding New Age thoughts and philosophies, but it requires a "buying into" of the concept of an "Earthfire" that it neither explains nor explores to my satisfaction. It's just there. This reminds me too much of the kind of proselytizing other mainstream religions do, and also perhaps is reminiscent of a bit of a "mind control" technique. It's too cultish for my tastes, and rather simplistic. It didn't address any of the serious issues I was hoping it would, except in a very vague and cowardly fashion. Nevertheless, if you can read it with an open mind and get from it the helpful resources regarding various forms of holistic healing, take what you need and leave the rest. Given that I bought the book because I saw it advertised in Magical Blend magazine, I'm afraid I was just a tad disappointed at how simplistic it really was.

I just finished this book and it touched my soul. It provided me with insight into crystals, tarot, breathing and so much more in a thought provoking and interesting visionary piece. It was a great

read.

If you like crystal, mysteries & metaphysical topics you'll like this book. A quick, interesting read.

I was given this book as a gift. It was not only a great adventure story, but was thought provoking and inspirational. Once I started I couldn't stop. Would highly recommend.

Apparently, a lot of people liked this book. I may not be the typical reader of such books. I am a one-time English major who has been interested in philosophy and meditation for over 45 years. More typical of my novel reading would be Dickens, Anthony Powell, and Iris Murdoch. I don't think I got past page 20 of this book. It seemed to consist of people yakking about New-Age stuff in a boring way. I find no fire, conflict, strong emotion, passion, wit, clever writing, interesting characters, etc, in the book - it's more like philosophy lite. Not for me.
