# Stop North Korea!: A Radical New Approach To The North Korea Standoff

## Synopsis

This radical new approach to dealing with North Korea offers a refreshing perspective on an intransigent and deadly situation. Imagine you control a multi-billion dollar capital fund, and North Korea is an underperforming corporation. You see it is undervalued and want to take it over, but it is controlled by an old-fashioned board of directors – the Kim family and a small number of ultra elites – who will not negotiate a deal. In this regressive situation it is logical to offer its shareholders – the political and military elites, government managers and bureaucrats, and the general population – a higher price for their shares to convince them to overrule their board of directors. *Stop North Korea! A Radical New Approach to the North Korea Standoff* applies this basic scenario to a situation that has become dire, and for which a strong positive solution is crucial. This book shows how investment rather than constraint – the carrot rather than the stick – will not only deter the North Korea threat, but enhance the global community in ways perhaps unimagined in the past.

## Customer Reviews

"Every peace loving person – diplomats, politicians, journalists, students, and general public should read this book. In addition, every library should have a copy of this book for their patrons. Suk Hi Kim, the Founding Editor of *North Korean Review*" At the core of Iverson's proposal to Stop North Korea is an 'unorthodox,' albeit highly intriguing, \$175 billion Reunification Investment Fund, designed to pay-for-peace by disbursing financial incentives to every North

Shepherd Iverson is a professor at Inha University in Incheon, Korea, where he has lived with his family for the past eight years. He is also the author of *One Korea: A Proposal for Peace* (2013).

This amazing, extremely well researched, and timely book was written by an American professor who has been living in South Korea for years. An obvious expert on the subject, Prof. Iverson has been thinking about the North Korean problem long before the world has taken much notice of the situation. He has predicted much of what has happened and the very culmination of events that we seem to be experiencing now. His proposed solution is both radically unique and yet perhaps the only viable path to a peaceful way out! If you think this is unorthodox or an unlikely long-shot, just take notice to how many political journalists have started to respond to Iverson's ideas with sincere urgency. Katharine Whittemore of the *Boston Globe* compares Iverson's solution to the Marshall Plan and calls it safer than the alternatives. Given the increasingly concerning war posture and ratcheted-up rhetoric of both Trump and Kim Jong Un, our world is in dire need of an alternative peaceful approach to resolving the North Korean conflict. Iverson offers us exactly that. Highly recommended!

I did read the book and know the author has lived in Korean, though not the North. I found the overall approach refreshingly unconventional as I have always counted on from Shepherd. The book was written and researched before the current "showdown" with the world, but Shep proves once again that he is a few steps ahead of the world. While it is not the definitive answer to "the Korea Question" (or questions) it does throw another solution into the mix. Sometimes not following orthodoxy IS the way out of a world that is walking a tightrope on the edge of chaos. Pick it up, read it, and think about the subject. Found the Korea-PRC-Japan discussion interesting. Worth the read--enjoyed the different perspective (even if I do not always share the same world view--I found the approach less radical but more intriguing. For my lack of "specifics" in this review, I really do want others to read it rather than hear my rehash or my other personal views. Nice work Dr. Shep!

This is not a "review," as the book (printed) is not available yet. Therefore, I gave it an average rating, which I will update after reading the book. But, my concern is that, after reading the "Look Inside" excerpts, I don't see where the author has actually been to the DPRK. That Rudyard Kiplingesque "gone native" comment in the preface certainly didn't help. Maybe I missed it, or his personal experiences in the country are there in some other part.
