Customer Reviews

From the editors at Aquascape Lifestyles magazine, the complete guide for the water garden enthusiast.

This small book touting Aquascape Lifestyles priced at over \$100 is little more than a Sunset How to Book and is actually the size of a magazine (93 total pages). Although there is some good information, that information can be found at a fraction of the cost with other new and used books that are out there. So, unless the price plummets to under \$20 don't even consider buying this book.

My husband and I were going back and forth about a pond. We didn't really know how to build it until we got this book. It gave us great ideas, guidelines to go by, and answered a lot of our questions. I'm a visual person so the photos were especially helpful.
